**Texas**

- Only 38 percent of Latinos have at least some postsecondary education, compared to 71 percent of Whites and 62 percent of Blacks.
- On average, Latino men with a bachelor’s degree or higher earn less than educated White men.
- On average, Latina women earn slightly less than White women with a high school or less education.
- Thirty-three percent of Latino workers without a bachelor’s degree have a good job.
- Between 2004 and 2014, Latinos have increased their college enrollment share by 10 percentage points at two-year colleges and by 13 percentage points at four-year colleges.
